PingYou Ltd; source lineage: Ryan Xu / Evan Daniel

Side reduction: 0.0017544663474202199868792619 68 (0.0098168%)

Verified: 302 unit squares, 1,208 wall conditions and all 45,451 pairs. Three orientations: 254 upright, 24 + 24 tilted.

Reported bound, rounded upward: s(302) <= 17.870275382734. The bound includes the finite rational guard.

A new best-known feasible upper bound against the sources checked; no claim of global optimality. Both drawings use the same scale.
